experienced organization

“Whenever a proven material is properly installed by competent and experienced workmen, complete satisfaction is always the result.” From the inception of our organization, this has been our policy.

We of Henges Company accept this as a challenge and are constantly doing everything we can to keep ourselves informed and up-to-date regarding new methods and techniques so that we can, at all times, be depended upon to cooperate with you to the fullest extent.

The same high standards apply to the products we use. The integrity and reputation of the manufacturer as well as the products he makes are carefully weighed. Only those which measure up to our requirements are accepted.

Our many thousands of satisfied users we believe proves the worthiness of this statement we like to make; namely a proven material properly installed means satisfaction.

ACOUSTI-CELOTEX

Noise (unwanted sound) in stores, restaurants, factories, schools, churches, hotels, etc., is in the same class with bad ventilation and poor lighting. This condition can be corrected through the use of Sound Conditioning, the art and practice of treating rooms and interiors of buildings so as to minimize the annoying effects of noise.

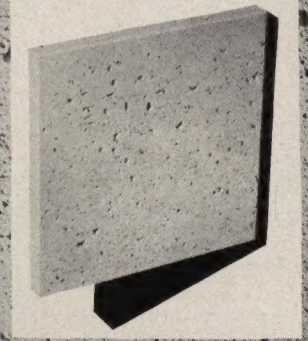

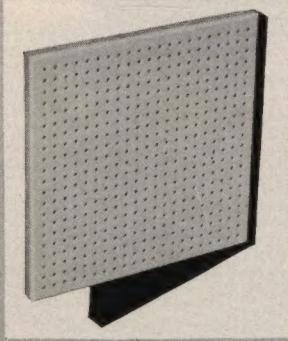

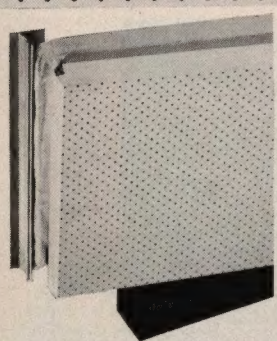

The noise is reduced in a Sound Conditioned room because the original sound dies out faster. It is not amplified by repeated reflections from ceiling to floor and wall to wall.

The Celotex Company makes and sells 50% of all the acoustical materials used in the U. S. today . . . proof in itself of the merit of the products which we use. Our sound engineers are factory trained to ably diagnose and correct the most baffling acoustical problem. Acousti-Celotex can be painted many times with any standard paint.

ACOUSTEEL combines a face of perforated steel with a wrapped pad of sound-absorbing rock wool to provide excellent sound absorption together with attractive appearance and incombustibility.

ACOUSTI-CELOTEX CANE FIBRE TILE is a light-weight, rigid unit combining excellent acoustical efficiency with a durable, smooth surface.

FISSURED MUFFLETONE like the standard type is a cast gypsum product which provides a sound-absorbing tile of light weight and desirable rigidity.

Colorful Durable FLOORS AND WALLS with **TILE-TEX**

TILE-TEX

A low-cost, highly durable, lasting floor covering, composed of asbestos, color pigment and special binders.

TUFF-TEX GREASEPROOF TILE

A floor covering built to stand severe conditions where grease and oil are a major problem.

FLEXACHROME

A floor covering of unique composition. Specially developed plastic binders and plasticizers together with asbestos fibers and color pigment produce a resilient flooring of unsurpassed beauty and great durability. A floor that will maintain its newness for many years. Many plain and marbelized colors are available and all harmonize. The use of feature strips and inserts lend distinction and variety.

MURA-TEX

A flexible, individual tile manufactured from asbestos fiber, mineral coloring pigment and special binders. Available in many rich colors and sizes to satisfy any decorative demand.

Mura-Tex Wall Tile is simple to install. It can be applied directly to new or old plaster or composition walls. The use of feature strips and inserts, with the proper choice of trim and contrasting or harmonizing colors, add variety to its design possibilities.

RUBBER TILE

A rubber flooring, quiet, easy underfoot, very durable and available in a wide range of colors and sizes.

WAX & CLEANER

A Henges Company product made to our specifications for use on all of the above floors.

Easy and economical to maintain, Tile-Tex products are ideal where traffic is a major maintenance.

The asbestos content of these products make them substantially incombustible.

Tile-Tex products can safely be installed at or below grade where dampness is present.

MARTIN-PARRY Movable

MODERN in design, smart in appearance and engineered to meet today's demand for greater flexibility in dividing floor space and covering interior walls, MARTIN-PARRY Movable Steel partitions and railing offer advantages unequalled in this field.

Quickly installed, permanent, yet easily movable, with a minimum of waste. A simplified system of dry wall construction complete in every detail, using standard unit parts prefabricated on a large-scale production basis.

No preliminary preparation is necessary. Continuous floor and ceiling channels are installed. The full-floating studs, having a snap-on device, are set in place between the channels and the flush panels are simply snapped on to the studs. All units are standard, hence they are interchangeable. They can be moved quickly and easily without mess or inconvenience by your own workmen.

CONSTRUCTION AND INSTALLATION FEATURES

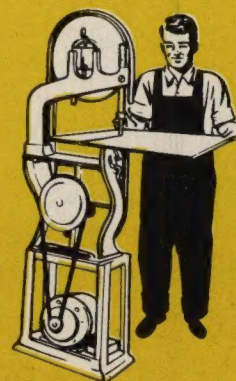

"SNAP-ON" METHOD

Cut-away showing how SNAP-ON Indent engages in Metal-wal Panel. This special, patented feature assures strength and rigidity.

LIGHT IN WEIGHT

Due to its unique construction, panels weigh only 2 lbs. per square foot and can be handled in full size by one man.

COMPLETE WORKABILITY

Panels can be cut with a saw on the job. This is particularly advantageous in providing for switch panels, and other openings.

Steel Partitions • METLWAL Paneling

IDEAL FOR ALL TYPES OF INTERIORS

M-P Movable Partitions and Paneling combine beauty with structural strength, utility and variety with economy. They are ideal for executive, general and factory offices, banks, stores, theatres, hospitals, schools, etc. The face sheets are predecorated . . . factory finished in natural wood grain or baked enamel finishes in a variety of colors. All panels are bonderized against rust and corrosion and will not require maintenance for many years.

FREE 10-Minute Demonstration!

We will gladly make this revealing demonstration which shows the EASY-TO-ERECT features and unique construction of Martin-Parry Movable Steel Partitions.

**Screen Out
The Sun
And Keep
Rooms
Cool!**

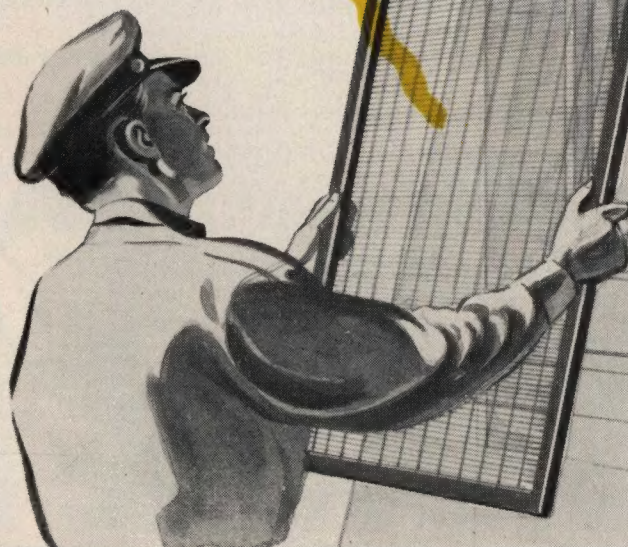

Ingersoll KOOLSHADE SUN SCREEN

The reason it is hot in summer is . . . THE SUN. And the reason why East-, West- and South-exposure rooms get hotter is that the sun's heat pours in through the windows. Up goes the temperature . . . ten . . . fifteen degrees higher than the free outside air . . . unbearable for anyone to live or work in.

The obvious and sensible solution is to prevent the sun-heat from entering the room. This is exactly what KOOLSHADE Sun Screen does. It is a fine bronze metal fabric that stops direct sun-heat rays before they strike the window, yet without affecting the view.

KOOLSHADE Sun Screens require no adjustment — they eliminate awnings and replace your present fly screens and their sturdy construction assures long life at little or no maintenance cost.

KOOLSHADE Sun Screens can be furnished for your present screen frames or they are also available in long-lasting aluminum frames which are made in our shop to fit your individual windows.

Comparison Proves KOOL-SHADE Superiority!

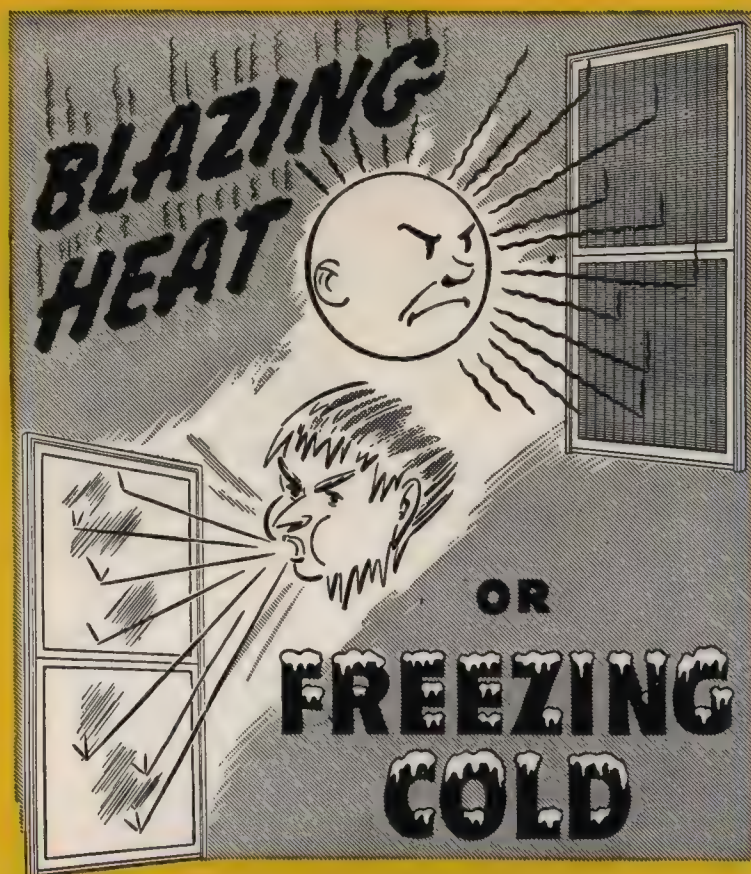

KOOLSHADE Sun Screens are so designed that no direct sun-heat radiation passes through when the sun is 40-degrees or more above the horizon.

ACTUAL SIZE OF KOOLSHADE FABRIC

Easier to see through than ordinary screens — and insect-proof too.

ALL-ALUMINUM STORM-SHADE

Gives Year-Round Comfort and Protection!

STORM-SHADE is the all-season unit for home, office or factory. It is a new and better storm window combined with KOOLSHADE Sun Screen.

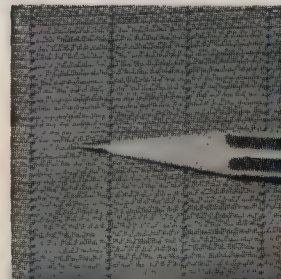

STORM-SHADE is quickly installed . . . will not crack, swell, warp or jam . . . changes from storm sash to screen from *inside the house* in just 30 seconds!

In winter, weather-tight **STORM-SHADE** windows keep the heat in. During the summer, **KOOL-SHADE** Sun Screen blocks sun heat rays, keeps sun-exposed rooms many degrees cooler.

Constructed throughout of durable, specially engineered aluminum that requires no painting or maintenance.

Combined with **KOOLSHADE** SUN SCREEN

KOOL-SHADE Sun Screen is a specially designed metal fabric that keeps the sun heat rays out but lets the light in. Keeps rooms as much as 15 degrees cooler! Insect proof, too.

STOP HEAT LEAKS **IN** AND **OUT!**

Top illustration shows how heat enters through the roof and walls in summer, making the interior unbearably hot and stuffy. The bottom illustration shows precious heat escaping by the same route in a house that is not insulated.

KEEP YOUR HOME IN THE *Comfort Zone* WINTER AND SUMMER WITH GENUINE **ROCK WOOL INSULATION**

To almost everyone, home means comfort—a place to relax. That's why you owe it to yourself, your family, to make it more inviting and more livable. Rock Wool Insulation, properly installed, will do just this.

In winter, insulation makes it possible to heat your home evenly, upstairs and down . . . makes substantial savings in fuel costs and contributes to the health and well-being of the entire family.

In summer, insulation means cool bedrooms for restful sleeping, a comfortably cool house during the day and pleasant meals in a cool dining room.

Get the benefits that only Rock Wool Insulation can give you. In all probability, you are paying for it in increased fuel bills, doctor bills and year 'round discomfort without enjoying its many advantages.

Standard Method of Installation

A plenum chamber or pent house is constructed over a grille which is installed in the top finished floor ceiling. The fan is placed in one end of the pent house, exhausting into the attic and out of the house through louvers or open windows.

Henges COMPANY, Inc.

2814 LOCUST STREET JEFFERSON 1778 . . .

What Users Say

THE MATERIALS SPEAK FOR THEMSELVES...HERE'S WHAT

You have recently completed another installation of ACOUSTI-CELOTEX in our third floor office areas of the Shell Building and I would like to comment on the manner in which this work was completed. The mechanics on the job were courteous, efficient and cooperative and certainly should be complimented on their ability.

GEORGE A. LOEHR, *Building Manager,*
Shell Oil Co.

We want to take this opportunity to express our reactions concerning the mechanics who laid the TILE-TEX floors in the halls and rooms of the American Hotel.

These men were more than cooperative and did everything possible to expedite the work with as little confusion as possible.

W. E. HANSEN,
The American Hotel

We are very well pleased with our STORM SHADE windows. The ease with which one can change from storm windows to the KOOL SHADE screens is especially convenient. The employee of the Henges Co. who installed the windows was very courteous and went about his work unobtrusively.

MRS. HARRY BRESNAHAN,
3329 Bendick Ave.

I wish to thank you for my beautiful floors. I am more than pleased. Also wish to thank the men who installed them for the interest they took and the wonderful job they did.

EDITH M. MANONVY,
4830 Austrice,
St. Louis, Mo.

I wish to compliment you on the efficient manner in which your men insulated my home, and would be more than glad to show any of your prospects the manner in which your insulation was put into my home.

MR. AARON ORCHARD
Orchard Paper Co.

I think you should know that we, the congregation of the Carondelet E. & R. Church are very much pleased with the installation of the Acousti-Celotex ceiling in the basement of our new church hall. The workmen who installed this work are to be complimented.

GEO. F. MEENEN,
Chairman of Committee on Construction

In the last several years we have had you install your sound-proof material on the ceilings of practically all of our office areas.

The sales engineering which you have made available, as well as the courteous and cooperative attitude expressed by your mechanics during installation, has contributed much to our being able to say, "A good job well done."

N. A. CRECELIUS, *Assistant Plant Engineer,*
Wagner Electric Corporation

... and am very much pleased with the manner in which your workmen handled the job of insulating my home.

HARRY J. NIEHAUS
7245 Creveling

Your company recently installed a TILE-TEX floor in a portion of our church and this is to express my hearty appreciation of the fine service you have given us. Whenever we are in need of anything in your line in the future you may expect a call from us.

HERBERT H. WATSON, *Minister*
Midland Presbyterian Church

About Our Service:

CUSTOMERS SAY ABOUT THE MEN WHO INSTALL THEM

At odd times during the installation of these partitions it was necessary for your mechanics to use power saws in ripping the metal partitions, which made some disturbance in our office. However, your men co-operated very strictly with any request that any of our employees made regarding this noise and would cease sawing for long-distance telephone conversations, etc. Your mechanics are very well trained and do a very efficient job of installation work. We were particularly aware of this fact inasmuch as we also maintain mechanics for our customers in our business.

R. G. REISMEYER, Meyer-Blanke Co.

In every detail you were so thoughtful and considerate and your workmen so quiet and gentlemanly that having the work done was not in the least annoying.

MRS. C. O. BOYNTON

The Acousti-Celotex ceiling which we installed in our private and main office several weeks ago is 100 per cent satisfactory.

We are very pleased with the installation and the results, and can highly recommend this type of ceiling.

WARNE NEIDRINGHAUS, *President*,
Neidringhaus Metal Products Co.

It would be difficult to over-emphasize the good effect of the sound treatment in our schools. I believe that the morale of the entire school has been affected, in addition to the peace of mind of those of us who are on the staff. Since this matter has been commented on by both visitors and students, I feel sure it is not my imagination.

JULIUS E. WARREN, *Superintendent*,
University City Public Schools

The installation of CELOTEX Sound Conditioning resulted in better employees' working conditions and this is especially true where we have considerable mechanical equipment. In making the installation, your workmen always performed their job in a courteous and workmanlike manner and to the entire satisfaction of our company.

WM. A. LAHRMANN, *General Office Manager*,
Universal Match Corporation

Particularly, we would like to mention how pleased we are with the MARTIN-PARRY office partitions and wall paneling that you furnished for all our private and general offices. The walnut wood grained finishes done on metal are so close to the "real thing" that they match all of our new walnut desks perfectly.

H. M. YOUNG,
Borbein-Young & Co.

We are glad to recommend your SUN SCREENS to anyone who may be contemplating using them. We find the awnings and shades are unnecessary as the screens do not permit the sun to penetrate but at the same time do not keep the breeze out. It can readily be seen that our office is considerably cooler than the average where ordinary screens and awnings are used.

H. W. SCHULTZ, *Office Manager*,
The C. V. Mosby Co.

We feel the installation of MARTIN-PARRY partitions was one of the finest investments we have ever made. In fact, we can honestly say it has paid for itself in six short months through word-of-mouth advertising by all who have seen it.

H. J. ECHELE, *President*,
Warwick Typographers, Inc.
